MICROTOME

1119. **Precision Rotary Microtome (Erma Japan Type)**
It incorporate a ball and flange type object holder for specimen centering. Knife holder with lateral movement permits use of complete knife edge and has a feed range of 1-25 microns in step of 1 micron each. Supplied complete with 1 knife 120mm long with back handle in box, 3 block holders one honing stone, one bottle of lubricant oil and a dust cover.
31000.00 Each

1120. **Precision Rotary Microtome (A.O. Spencer Type)**
It has a front located feed indicator with CAM DRIVE SYSTEM setting from 1-50 microns in step of 1 micron each. The object clamp takes specimen upto 32x27mm. On steam of block holders. The cutting angle is adjustable through 30 degree two levers are provided for releasing knife holder for resetting angles and a third lever releases the entire assembly for movement on side ways to adjust horizontal distance form object. Supplied with one knife of special alloy steel 120mm. long with back and handle in box, 3 block holders, one honing stone, one bottle of lubrication oil and dust cover
